

SANCHIT KUMAR

React Frontend Developer | JavaScript | API Integration | Node.js Basics

Phone: +91 9999745141 | Email: sanchitrohella@gmail.com | LinkedIn: linkedin.com/in/sanchitkumarroh | GitHub: github.com/sanchitrohella | Locations: Hyderabad / Remote

PROFESSIONAL SUMMARY

React Frontend Developer with 3 years 9 months of experience in building responsive, user-friendly, and business-focused web applications using React.js, JavaScript, HTML5, CSS3, Material UI, Redux, Vue.js, and REST API integration.

Experienced in developing reusable UI components, implementing frontend features, debugging UI/API issues, supporting live applications, handling client calls for support projects, and coordinating with clients, backend teams, QA teams, and stakeholders for active development projects.

Hands-on exposure to Git, GitHub, Azure App Service deployment support, Chrome DevTools, Postman, Mixpanel event tracking, and cross-browser debugging. Completed end-to-end Node.js and Express.js learning with backend project implementation, giving practical understanding of full-stack application flow.

TECHNICAL SKILLS

Frontend: React.js, JavaScript ES6+, HTML5, CSS3, Material UI, Redux, Vue.js, Responsive Web Design

Frontend Concepts: Component-Based Architecture, React Hooks, Props, State Management, Conditional Rendering, Form Handling, REST API Integration, Cross-Browser Compatibility

Backend Basics: Node.js, Express.js, REST APIs, Routing, Middleware, Basic Authentication Flow

Tools & Platforms: Git, GitHub, VS Code, Postman, Azure App Service, Chrome DevTools

Testing & Debugging: UI Debugging, API Debugging, Browser Debugging, Cross-Browser Testing, Selenium IDE, Unit Testing Basics

Analytics: Mixpanel Event Tracking

Professional Skills: Requirement Understanding, Client Communication, Client Calls, Issue Resolution, Production Support, Team Collaboration, Stakeholder Coordination

WORK EXPERIENCE

Aays Analytics | Front-end Engineer

Jan 2024 - Present

- Working as a Frontend Engineer on React-based enterprise web applications, focusing on UI development, API integration, debugging, support, and feature implementation.
- Developed and maintained responsive frontend screens using React.js, JavaScript, HTML5, CSS3, Material UI, and reusable component-based architecture.
- Integrated frontend modules with backend APIs and handled data rendering, form validations, loading states, error handling, and user interaction flows.
- Independently handled client calls for support projects, including requirement clarification, issue discussion, status updates, and coordination for timely resolution.
- Connected with clients and stakeholders for active development projects to understand requirements, clarify UI flows, discuss issues, and provide implementation updates.
- Supported Daimler-related enterprise web applications by resolving frontend issues, coordinating with backend teams, checking application behavior, and supporting regular project activities.
- Assisted in Azure App Service deployments and environment-level checks for development and production releases.
- Used Chrome DevTools and browser debugging techniques to identify UI issues, API response issues, styling bugs, and cross-browser behavior differences.
- Implemented and supported Mixpanel event tracking to capture user interactions and improve visibility into product usage.
- Worked closely with backend developers, QA teams, and business stakeholders to deliver frontend changes within timelines.

Foundit.in, formerly Monster India | Software Developer

Jul 2022 - Jan 2024

- Developed frontend features for job seeker-facing web pages using JavaScript, HTML5, CSS3, Vue.js, and framework-based UI development.
- Contributed to the Job Description section on the Job Search page, improving content presentation and user interaction.
- Implemented frontend changes for recruiter action workflows on the Notification page, improving visibility of recruiter-related updates.
- Worked on Account Visibility and Block Company features, helping users manage privacy and company-level visibility preferences.
- Contributed to the Applied Success page and Profile Performance page, including UI updates for graph-based user insights.
- Collaborated with product, QA, and backend teams to debug issues, validate functionality, and deliver frontend enhancements.

KEY PROJECTS AT AAYS ANALYTICS

MARS Nutrition Simulation Project

Role: Dedicated Frontend Developer | Tech Stack: React.js, JavaScript, HTML5, CSS3, Material UI, REST APIs

- Working as the dedicated frontend developer for a new MARS Nutrition project focused on creating a simulation environment related to nutritional values of MARS product recipes.
- Developing responsive and interactive UI screens for recipe-based nutrition simulation workflows.
- Creating frontend components for displaying product recipe data, nutritional value information, and simulation-related user inputs.
- Coordinating with backend developers and stakeholders to understand data requirements, API responses, and frontend implementation needs.
- Handling UI development independently, including layout design, component structuring, form handling, and integration with backend APIs.

Daimler Support Projects

Role: Frontend Developer / Support Engineer | Tech Stack: React.js, JavaScript, HTML5, CSS3, API Integration, Azure App Service

- Supported Daimler-related web applications by handling frontend issues, UI bugs, environment checks, and support-related client communication.
- Independently participated in client calls to discuss reported issues, understand support requirements, provide status updates, and coordinate next steps.

- Investigated frontend issues using browser debugging tools and coordinated with backend teams when issues were related to API behavior or application data.
- Assisted in deployment-related checks and release support activities for development and production environments.

Generative AI Chatbot for Financial Report Generation

Role: Frontend Developer | Tech Stack: React.js, JavaScript, HTML5, CSS3, API Integration

- Developed UI screens and frontend flows for a Generative AI chatbot used for financial report generation.
- Focused on chatbot layout, user interaction flow, input handling, response display, and frontend usability.
- Coordinated with internal teams to align the UI behavior with business requirements and AI-generated output flow.

PERSONAL PROJECTS

FitMitra AI - AI-Powered Fitness Assistant

Tech Stack: React.js, Node.js, Express.js, Database, OpenAI API

- Building a full-stack fitness assistant for Indian gym-goers to generate personalized workout plans, vegetarian diet suggestions, and weekly progress feedback.
- Implementing user fitness profile creation, goal-based recommendations, API integration, and AI-generated responses.
- Designing clean React UI screens with reusable components, form handling, and API-based data flow.
- Developing backend APIs using Node.js and Express.js for user profile management, plan generation, and progress tracking.

Food Ordering App

Live Link: sprightly-lolly-67afd3.netlify.app

- Built a responsive food ordering web application with reusable frontend components, menu listing, and cart-related UI flow.

Grocery List App

Live Link: aesthetic-liger-696601.netlify.app

- Developed a grocery list management app with add, update, delete, and list display functionality.

EDUCATION

- M.Tech in Signal Processing and Digital Design - Delhi Technological University, Delhi | Aug 2019 | CGPA: 7.74/10
- B.Tech in Electronics and Communication Engineering - Bhagwan Parshuram Institute of Technology, GGSIPU, Delhi | May 2012 | Percentage: 76.9%

PREVIOUS PROFESSIONAL EXPERIENCE

- Tax Assistant - Central GST, Delhi | Jun 2016 - Jul 2022
- Worked in a government role before transitioning into software development, building discipline, documentation habits, analytical thinking, and professional communication skills.
